

# CRITIQUE PRESENTATION

Yingying Lin

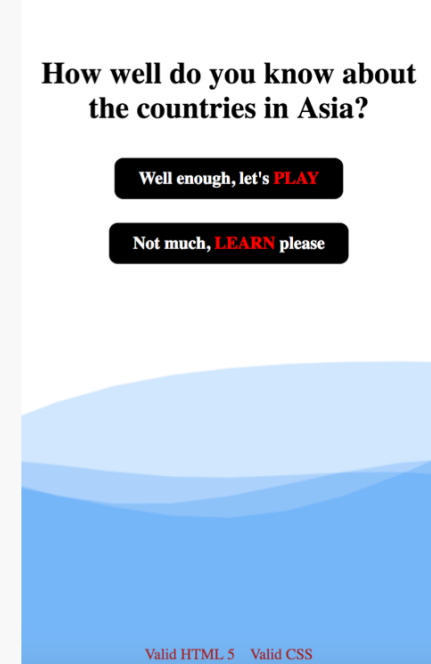

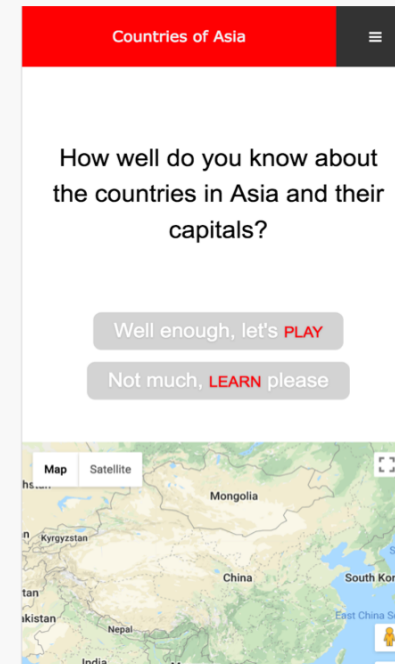

# Project Brief

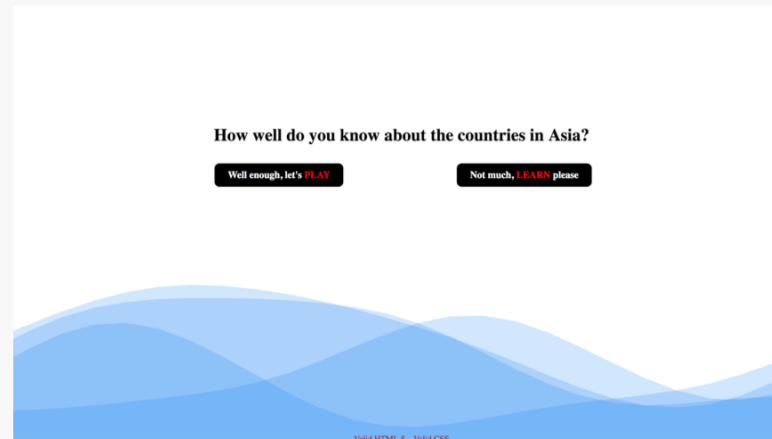

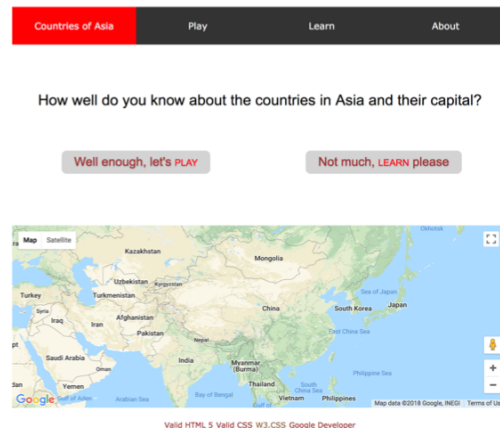

- A teaching and quiz website that allows you to explore and learn about Asian countries and test your knowledge about their locations.
- When you first start the website, it will have two options; you can either quizzes your knowledge of how well you know about the Asian countries, or you can choice to gain knowledge about those Asian countries.
- On the “learn” page, it provides you a list of Asian Countries and you can pick these countries on a map. The goal is that by the end, you will you be able to tell where to find countries like Iraq, Malaysia, and Oman. On the “Play” page, you will be ask you name the Asia countries you know.
- goals for the overall look is to design a simple yet stylish interactive website

# Comparative

## Think “Mobile First”

Nowadays, more likely that my website visitors will be mobile users instead of desktop users

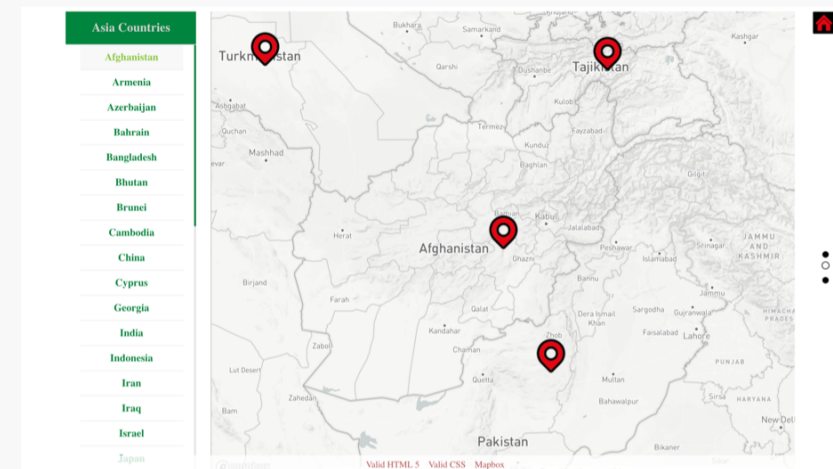

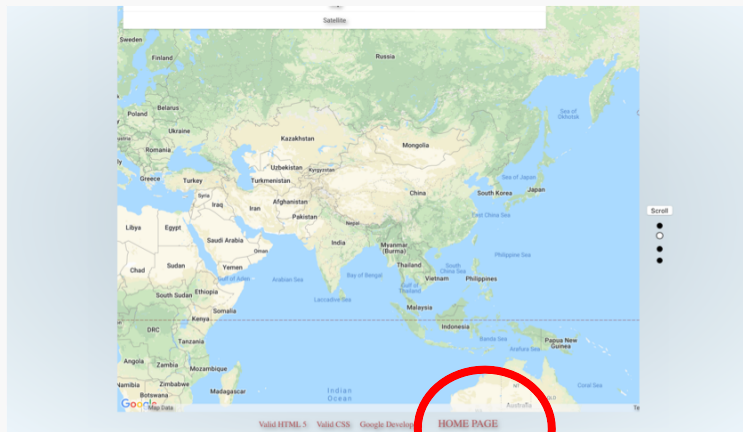

# target audience test/results

Audience Testers

Challenge

NO JQuery

# Final Prototype
